COURSE TITLE: INNOVATIONS IN NEUROPSYCHOLOGY

COURSE CREDIT: THREE (3)

SUBMISSION DATE: 16TH SEPTEMBER, 2026

LECTURER: DR. OPHELIA ANARFI

INSTRUCTIONS:

- 1. This Project is group work.**
- 2. Jointly acquire the electronic device for the project.**
- 3. Submit the electronic device with the project saved on it.**
- 4. Send both soft and hard copies of Part 2 of the assignment.**

GROUP PROJECT (100 MARKS)

1. As part of your innovation in neuropsychology, develop an electronic version of the following tests;
 - i. Cognitive screening tests (Montreal Cognitive Screening Test [MoCA])
 - ii. Revised Quick Cognitive Screening Test (RQCST)
 - iii. Rey Complex Figure Test
 - iv. Trail-Making Test
 - v. Brief Symptom Inventory -18 (BSI-18).

(You may add any additional relevant tool).

2. Pilot these developed tests on two (2) patients and outline the administration, scoring and challenges of this version of the tests. Produce a write-up on how the gadget with the electronic versions of the tests can be used.

ALL THE BEST!
